

Improvement plan for ARDROSSAN AREA SCHOOL

2019 to 2021

School name

ARDROSSAN AREA SCHOOL

Vision statement

Our students are critical and creative thinkers who positively impact on their local and global communities.

Government
of South Australia
Department for Education

Plan summary

This table will be automatically populated to provide a summary of your plan.

Goals	Targets	Challenge of practice	Success criteria
Through the proficiencies, increase student understanding of Number in Reception to Year 10.	50% of all students in Year 3-10 correctly answer all Number and Algebra questions in PAT-M.	If we develop and implement common evidence based approaches to teaching Number, based on the Big Ideas in Number, we will increase the number of Year 3-10 students meeting the SEA for Mathematics.	R-2 students can make rapid, accurate and confident judgments of numbers (trusting the count). Year 3-6 students can efficiently count large collections and confidently make, name, record, compare, order, sequence and count forwards and backwards and rename numbers, according to their parts (Place value). They can also work efficiently with an extended range of numbers (multiplicative thinking). Year 7-9 students can work efficiently with an extended range of numbers (multiplicative thinking) and are able to recognise the value of each digit within a number given by its place and separate the number into its component parts.
	All Year 3-10 students achieve SEA for PAT-M and NAPLAN Numeracy appropriate to their year level. 10% increase in the number of students in NAPLAN Numeracy high band achievement.		
	All Year 3-10 students achieve SEA for PAT-M and NAPLAN Numeracy appropriate to their year level. A 10% increase in the number of students in NAPLAN Numeracy high band achievement		
Increase reading comprehension for all Reception to Year 10 students	All questions in the PAT-R(c) are answered correctly by a minimum of 30% of all Years 3 to 10	If we develop and implement common evidence based approaches to teaching reading comprehension, based on the Big 6 Reading, we will increase student's ability to infer meaning and link ideas from a range of text types. This will increase the number of Year 3-10 students meeting the SEA for Reading.	R-2 students can recognise sounds in words and match letters to sounds. Students are able to answer simple recall and inference questions about a text read. Year 3-10 students can identify question types and use appropriate strategies to answer the 4 classifications of: retrieving directly stated information, interpreting by making inferences, interpreting explicit information and reflecting on texts.
	All Year 3-10 students achieve SEA for PAT-R(c) and NAPLAN Reading appropriate to their year level. 10% increase in the number of students in NAPLAN Reading high band achievement		
	All Year 3-10 students achieve SEA for PAT-R(c) and NAPLAN Reading appropriate to their year level. 10% increase in the number of students in NAPLAN Reading high band achievement
